

## HD-15 – FLOODING SUBMERSIBLE PUMP

The HD-15 pump is manufactured by APP Pumps and comes with a two-year guarantee. It is a submersible pump ideal for site drainage, and used frequently by hire fleets, utilities, mines & quarries, construction and dewatering.

This impressive, high-flow pump delivers exceptionally large flows from a small single motor. It was purposely designed by APP Pumps to be used as a contractors' pump, on-site when the water contains silt and sand in suspension. There are two different types of the HD-15 pump, one is manual, the other is automatic.

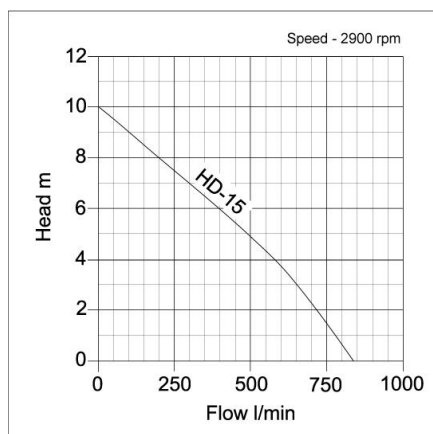

The continuously rated motor makes this suitable for use in large ponds and for water features. There is no need for an external control box due to the clever design and the inclusion of an internal capacitor and motor protection.

Specialist wear-resistant ductile iron have been used for the impeller, the casing and the suction cover. Cast iron has also been used for the motor head cover.

The HD-15 pump comes with 10m of heavy-duty rubber power cable as standard.

HD-15

### Suitable for:

- Flooding submersible
- Water features / ponds
- Site Drainage
- Construction / In water works
- Hire fleets
- Utilities
- Dewatering
- Water features
- Mines / quarries

Model	Manual / Auto	Outlet (mm)	kW	Volt	Flow (l/min)	Head (Mtrs)	Free passage (mm)	W x l x h (mm)	Dry Weight	Packing Weight
HD-15	M	80	1.15	110/230	830	10	9	190x310x505	25.45	26.95
HD-15	A	80	1.15	110/230	830	10	9	190x310x505	26.10	27.60

Optional extra: 50mm outlet (part number H-30080001)
