

## BABY BATTERY – SUBMERSIBLE PUMP

This range of submersible pumps from Umbra Pompe are ideally suited for application in sumps & bilges, industry, leisure, processing, transfer and filling. These pumps are solely battery operated.

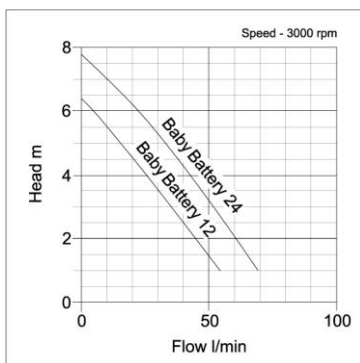

The Baby Battery series are low voltage, D.C pumps that are water pumps. They are especially popular in boat bilges. They are also frequently used as pumps for generic drainage and transfer. The duty cycle is approximately 20 minutes long.

The two models in this series are the Baby Battery 12 and the Baby Battery 24. The 12 and 24 numerals represent the voltage of the pump. They are available in manual or automatic. The dry weight of both pumps is 3.6kg and they are both 26cm in height. The Baby Battery 12 has a flow of 55 litres per minute and is 175 watts; while the Baby Battery 24 has a higher flow rate of 69 litres per minute and is 220 watts.

All Baby Battery pumps come with 5m of PVC power cable which is easily fitted with crocodile clips.
