

DSPK

1 & 3 PHASE CUTTER

**NEW!
WIDER
RANGE**

- Domestic
- Industrial
- Basement systems
- Small pumping stations
- Foul waste tanks
- Fixed installations

The DSPK (formerly DSK) range of cutter pumps are for sewage and industrial applications where destructible solids need to be reduced to enable the reliable movement of the liquid.

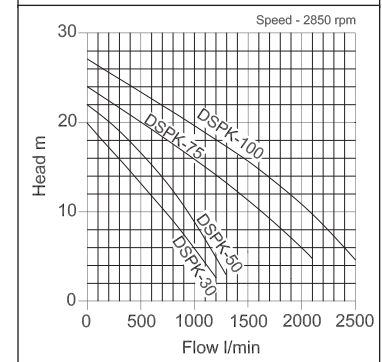

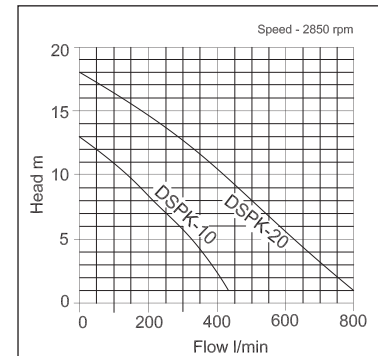

They are constructed in cast iron and 304 stainless steel, and are fitted with a tungsten carbide tipped, single channel, cast iron impeller which rotates against a serrated suction cover. The 410 stainless steel shaft is fitted with a mechanical seal and oil seal, in an oil chamber. They are suitable for sewage in domestic and industrial applications, where the fragmented suspended solids are to be pumped over a short to medium distance. Supplied as standard free-standing, and optional auto coupling set is available for guide rail mounting. Single-phase models are available with or without a float-switch. Supplied with 10 metres of heavy duty rubber power cable.
